

Keep It Shiny™

# SPLASHTACULAR

Waterslides and Waterpark Attractions

## Protect Your Investment.

We're the only company in North America, and perhaps the world, to include an industrial strength, protective finish standard on all waterslide exteriors. It's called KEEP IT SHINY™. With it, rides will look as glossy and colorful for years as the day they were installed. Without it, it's only a matter of time before UV rays and winter weather take a toll on their luster. The more pigmented and vivid the ride's color, especially red, blue and purple, the worse the fading. KEEP IT SHINY™ is resistant to dust, dirt and calcium build-up, making it the perfect, low-maintenance solution for indoor and outdoor rides and attractions. KEEP IT SHINY™ results in a beautiful, ultra-shiny finish compared to less effective coatings that have a satin or matte look. Did we mention it's standard?
