

Ride Specifications

- Height** 54'
- Footprint** 90' x 149'
- Four riders at a time (2 per entry) for generous throughput**
- No pool required**
- Required rafts are hand carried**

The Double BowlsEye® XT scores maximum fun points. With all the exhilaration of the original Double BowlsEye®, the XT version sports an economical, unique two-tower design crowning this standalone raft ride. A pair of conveyor launching entries propel two pairs of riders in sync down a winding raft flume before they burst into the world's first dual exit raft bowl. All four riders chase each other around the bowl, revolving multiple times before exiting through one of two runouts. Which one? Nobody knows, which is part of the fun. Not to mention the banter between riders.
