Footprint 90' x 149'

Required rafts are hand carried

Four riders at a time  
(2 per entry) for generous  
throughput

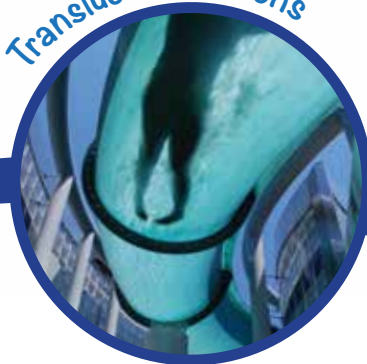

Conveyor Launch

Translucent Bands

Translucent Sections

## SPLASHTACULAR®

Waterslides and Waterpark Attractions

The Double BowlsEye™ DT scores maximum fun points. With all the exhilaration of the original Double BowlsEye™, the DT version sports an economical, unique two-tower design crowning this standalone raft ride. A pair of conveyor launching entries propel two pairs of riders in sync down a winding raft flume before they burst into the world's first dual exit raft bowl. All four riders chase each other around the bowl, revolving multiple times before exiting through one of two runouts. Which one? Nobody knows, which is part of the fun. Not to mention the banter between riders.
