Waterslides and Waterpark Attractions

DOWN UNDER

Prepare for launch! DownUnder™ is an unprecedented attraction with individual DrenalineDrop™ launch modules arranged around the perimeter of the platform. Riders watch each other while anticipating their turn. Hearts race... who will drop first? When the launch button is hit, the floor drops out beneath each of the riders, launching them down near-vertical enclosed body slides. The slides twist and turn for over 255 feet, each taking a different path to the bottom. DownUnder's unique configuration can accommodate any number of slides, creating maximum throughput and maximum fun.
